IMAGINE

A COMPANY THAT TAKES ON THE TOUGHEST HEALTH CHALLENGES BUT DOES MUCH MORE THAN JUST TREAT DISEASES

abbvie

PEOPLE. PASSION. POSSIBILITIES.®

WE ARE ABBVIE, A HIGHLY FOCUSED, RESEARCH-DRIVEN BIOPHARMACEUTICAL COMPANY.

It takes a global leader to deliver patient-centered solutions around the world. We uniquely combine the assets and capabilities of an experienced pharmaceutical company with the flexibility and focus of a biotech to pursue the most meaningful opportunities for patients. The result is a research-driven biopharmaceutical company committed to developing innovative advanced therapies to address today's health issues — from life-threatening illness to chronic conditions.

We target specific difficult-to-cure diseases where we can leverage our core research and development (R&D) expertise to advance science and create solutions that go beyond treating the illness to have a positive impact on patients' lives, as well as on economies, societies, and science itself. We look at problems holistically, from many perspectives, because that's how you find the best solutions to the world's increasingly complex challenges.

IMPACT ON SCIENCE

INVESTING $4.2 BILLION TO ADVANCE SCIENCE

It takes unwavering commitment and confidence to bring solutions from the petri dish to patients. AbbVie invested $4.2 billion* in research and development (R&D) in 2016 to discover and test compounds with the potential to treat more than 400 million people across the globe. AbbVie is deeply committed to efforts that advance science and solve the world's toughest health challenges.

*Reflects 2016 R&D investment excluding specified items. 2016 GAAP R&D investment totaled $4.4B.

8,000+ R&D EMPLOYEES AT WORK TODAY

AbbVie's innovation is driven by leading scientists and facilities. IDEA Pharma's Productive Innovation Index ranked AbbVie number 5 among the top 30 pharmaceutical companies most successful at developing and commercializing new medicines.[2]

21 STATE-OF-THE-ART R&D AND MANUFACTURING CENTERS

DRIVING INNOVATION, TOGETHER

AbbVie partners with approximately 310 leading biotechs, universities, nonprofits, and government organizations to collaborate and advance science every year.

The acquisition of Stemcentrx and its unique cancer stem cell approach provides us with a potential way to target the root cells of tumors. These cells are responsible for helping tumors to reproduce and spread throughout the body. The Stemcentrx discovery and early development platform, combined with AbbVie's ongoing discovery efforts in oncology, create a powerful engine to produce a steady stream of new novel targets and medicines in solid tumors.

ADVANCING SCIENTIFIC KNOWLEDGE EVERY DAY

Our scientists in the medical research community published more than 940 papers in 2016—allowing others to build on scientific knowledge we developed.

We're also constantly looking for great ideas outside our own walls. More information is available at www.openinnovation.abbvie.com.

INVESTING IN TOUGH HEALTH CHALLENGES

An estimated one billion people suffer from neglected tropical diseases.[4] In response, nearly 250 of AbbVie's most experienced scientists voluntarily contribute expertise to partner organizations and help advance the discovery and development of new medicines for onchocerciasis (river blindness), lymphatic filariasis (elephantiasis), malaria, and tuberculosis. Since 2013, AbbVie scientists have dedicated 60,000 pro bono hours to researching neglected diseases.

IMPACT ON ECONOMIES

EACH JOB AT ABBVIE CREATES OPPORTUNITY FOR OTHERS

AbbVie is an economic multiplier. With approximately 29,000 employees globally, our total impact on employment is up to four times that amount through direct and indirect business activity.[6] The jobs we create pay well and attract a workforce with diverse skills and educations, including Ph.D. research scientists, laboratory technicians, support staff and more, who live, work, and spend money in their local communities. We also spend millions of dollars each year with suppliers purchasing goods and services. This all provides benefits for third-party suppliers and local economies in the form of higher sales, tax revenue, and economic development.

We value the diverse backgrounds and perspectives of our employees, and we have an inclusive culture. AbbVie is also committed to recruit, engage, and support U.S. troops and veterans as they re-enter civilian life.

56,000 SUPPLIERS BENEFIT FROM OUR $8 BILLION IN SPENDING

In 2016, AbbVie spent more than $8 billion with more than 56,000 third-party suppliers across multiple industries. AbbVie creates opportunities and growth in industries that support the discovery, development, and distribution of new medicines. This investment includes diverse suppliers: AbbVie spent over $515 million with approximately 2,000 U.S. small and diverse-owned businesses in 2016.
